Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 17, 18 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Kwon (U.S. Patent 6,622,442).

Kwon discloses a connector system for interconnecting reinforcing elements embedded in a pair of mating concrete structures (Figures 1A-1C, for example). There is a male connector (48) and a female socket (48) positioned as claimed (Figure 5, for example). The female socket fixture has an open top (left side, Figure 11). Because there are no specific recitations regarding how the male connector is enlarged, the elongated structure shown in Figure 10 is deemed to meet claim recitations.

Regarding claim 18, see Figures 5 and 11.

Regarding claim 20, the term "keyhole" is deemed to be met by the structure shown in Figures 8 and 9.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kwon, as applied above.

Kwon teaches the threaded end but does not teach the nut received there on. It is known to attach threaded nuts on threaded connector ends associated with ends of slabs, panels, etc. in order to facilitate engagement with a plate at a terminal end of the structure, for example. For this purpose, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have used a nut on the end of Kwon. Note that since the male and female ends are not recited as being connected, this arrangement is possible when the male end is not received within the female connector; therefore, it is within the scope of the claims.

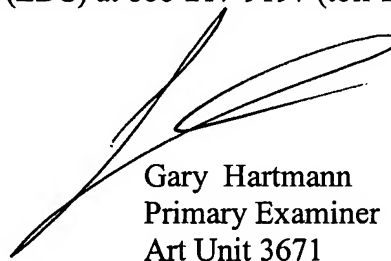

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Hartmann whose telephone number is 571-272-6989. The examiner can normally be reached on Monday through Thursday, 9am-7pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Will can be reached on 571-272-6998. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
